DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

With respect to amended claims and the interview with applicant's Attorney on April 08, 2003.

An important feature of the invention is that, in an electric axial flow machine with an ironless disk-shaped rotor which is arranged on a machine shaft and has permanent magnets which are embedded in a fabric-reinforced plastic, the permanent magnets are each joined with a positive fit to the surrounding fabric-reinforced plastic together with the permanent magnets and the machine shaft forms a dimensionally stable unit.

The prior art of the record fails to teach an electric axial flow machine including *an ironless disk-shaped rotor arranged on a machine shaft and having permanent magnets embedded in a fiber or fabric-reinforced plastic and, on both sides next to the rotor a stator, wherein the permanent magnets are each joined to the surrounding fiber or fabric-reinforced plastic so that the permanent magnets and the machine shaft form a dimensionally stable unit.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
